The mixer, kneading machine, eggbeater Planet Big Line is excellent in laboratory use and for the confectionery, food, chemical and cosmetic industries. The very strong structure, **the electric system to move the bowl with drawing out on trolley without unhooking the tool**, the high couple and power make these mixer particularly suitable to effect heavy working. **The bowl locks automatically when it gets to the working position.** The tools turn very close to the inner wall of the bowl and mix perfectly the product, even with little doses. **The stainless steel rotating safety grill is removable for cleaning.** All moving parts are mounted on ball bearings, which do not require maintenance and make the machine steady and silent. The machine is manufactured according to CE current standards.
